

ClimateCare™

Advanced MicroClimate Management

Keep your patient cool, dry, and comfortable

ClimateCare™ is a unique mattress coverlet system that provides microclimate management. When used in conjunction with a pressure redistribution mattress, ClimateCare is designed to address the root causes of tissue breakdown through the management of temperature and moisture (microclimate) at the interface between the patient and the surface.

Available in 36, 42, and 48 inch width
(91.4, 106.7, and 121.9 cm)

Coverlet draws excess moisture away from the skin while also reducing the skin temperature

- ◊ NPUAP/EPUAP recognizes importance of removing excess moisture and heat on skin to mitigate pressure ulcer risk factors
- ◊ Effective moisture removal with high rate of moisture vapor transfer may reduce skin maceration*
- ◊ Reduces skin temperature at mattress interface improving patient comfort*
- ◊ Coverlet material helps reduce friction and shear
- ◊ Easy to use requiring no user intervention
- ◊ Compatible with pressure redistribution surfaces including the P.R.O. Matt® Plus and Dolphin™ Fluid Immersion Simulation® Systems
